Schedule a Demo

The Smartest Digital Voice Assistant For Your Dental Practice

Denta uses voice artificial intelligence (AI) to fulfil your needs in the areas of

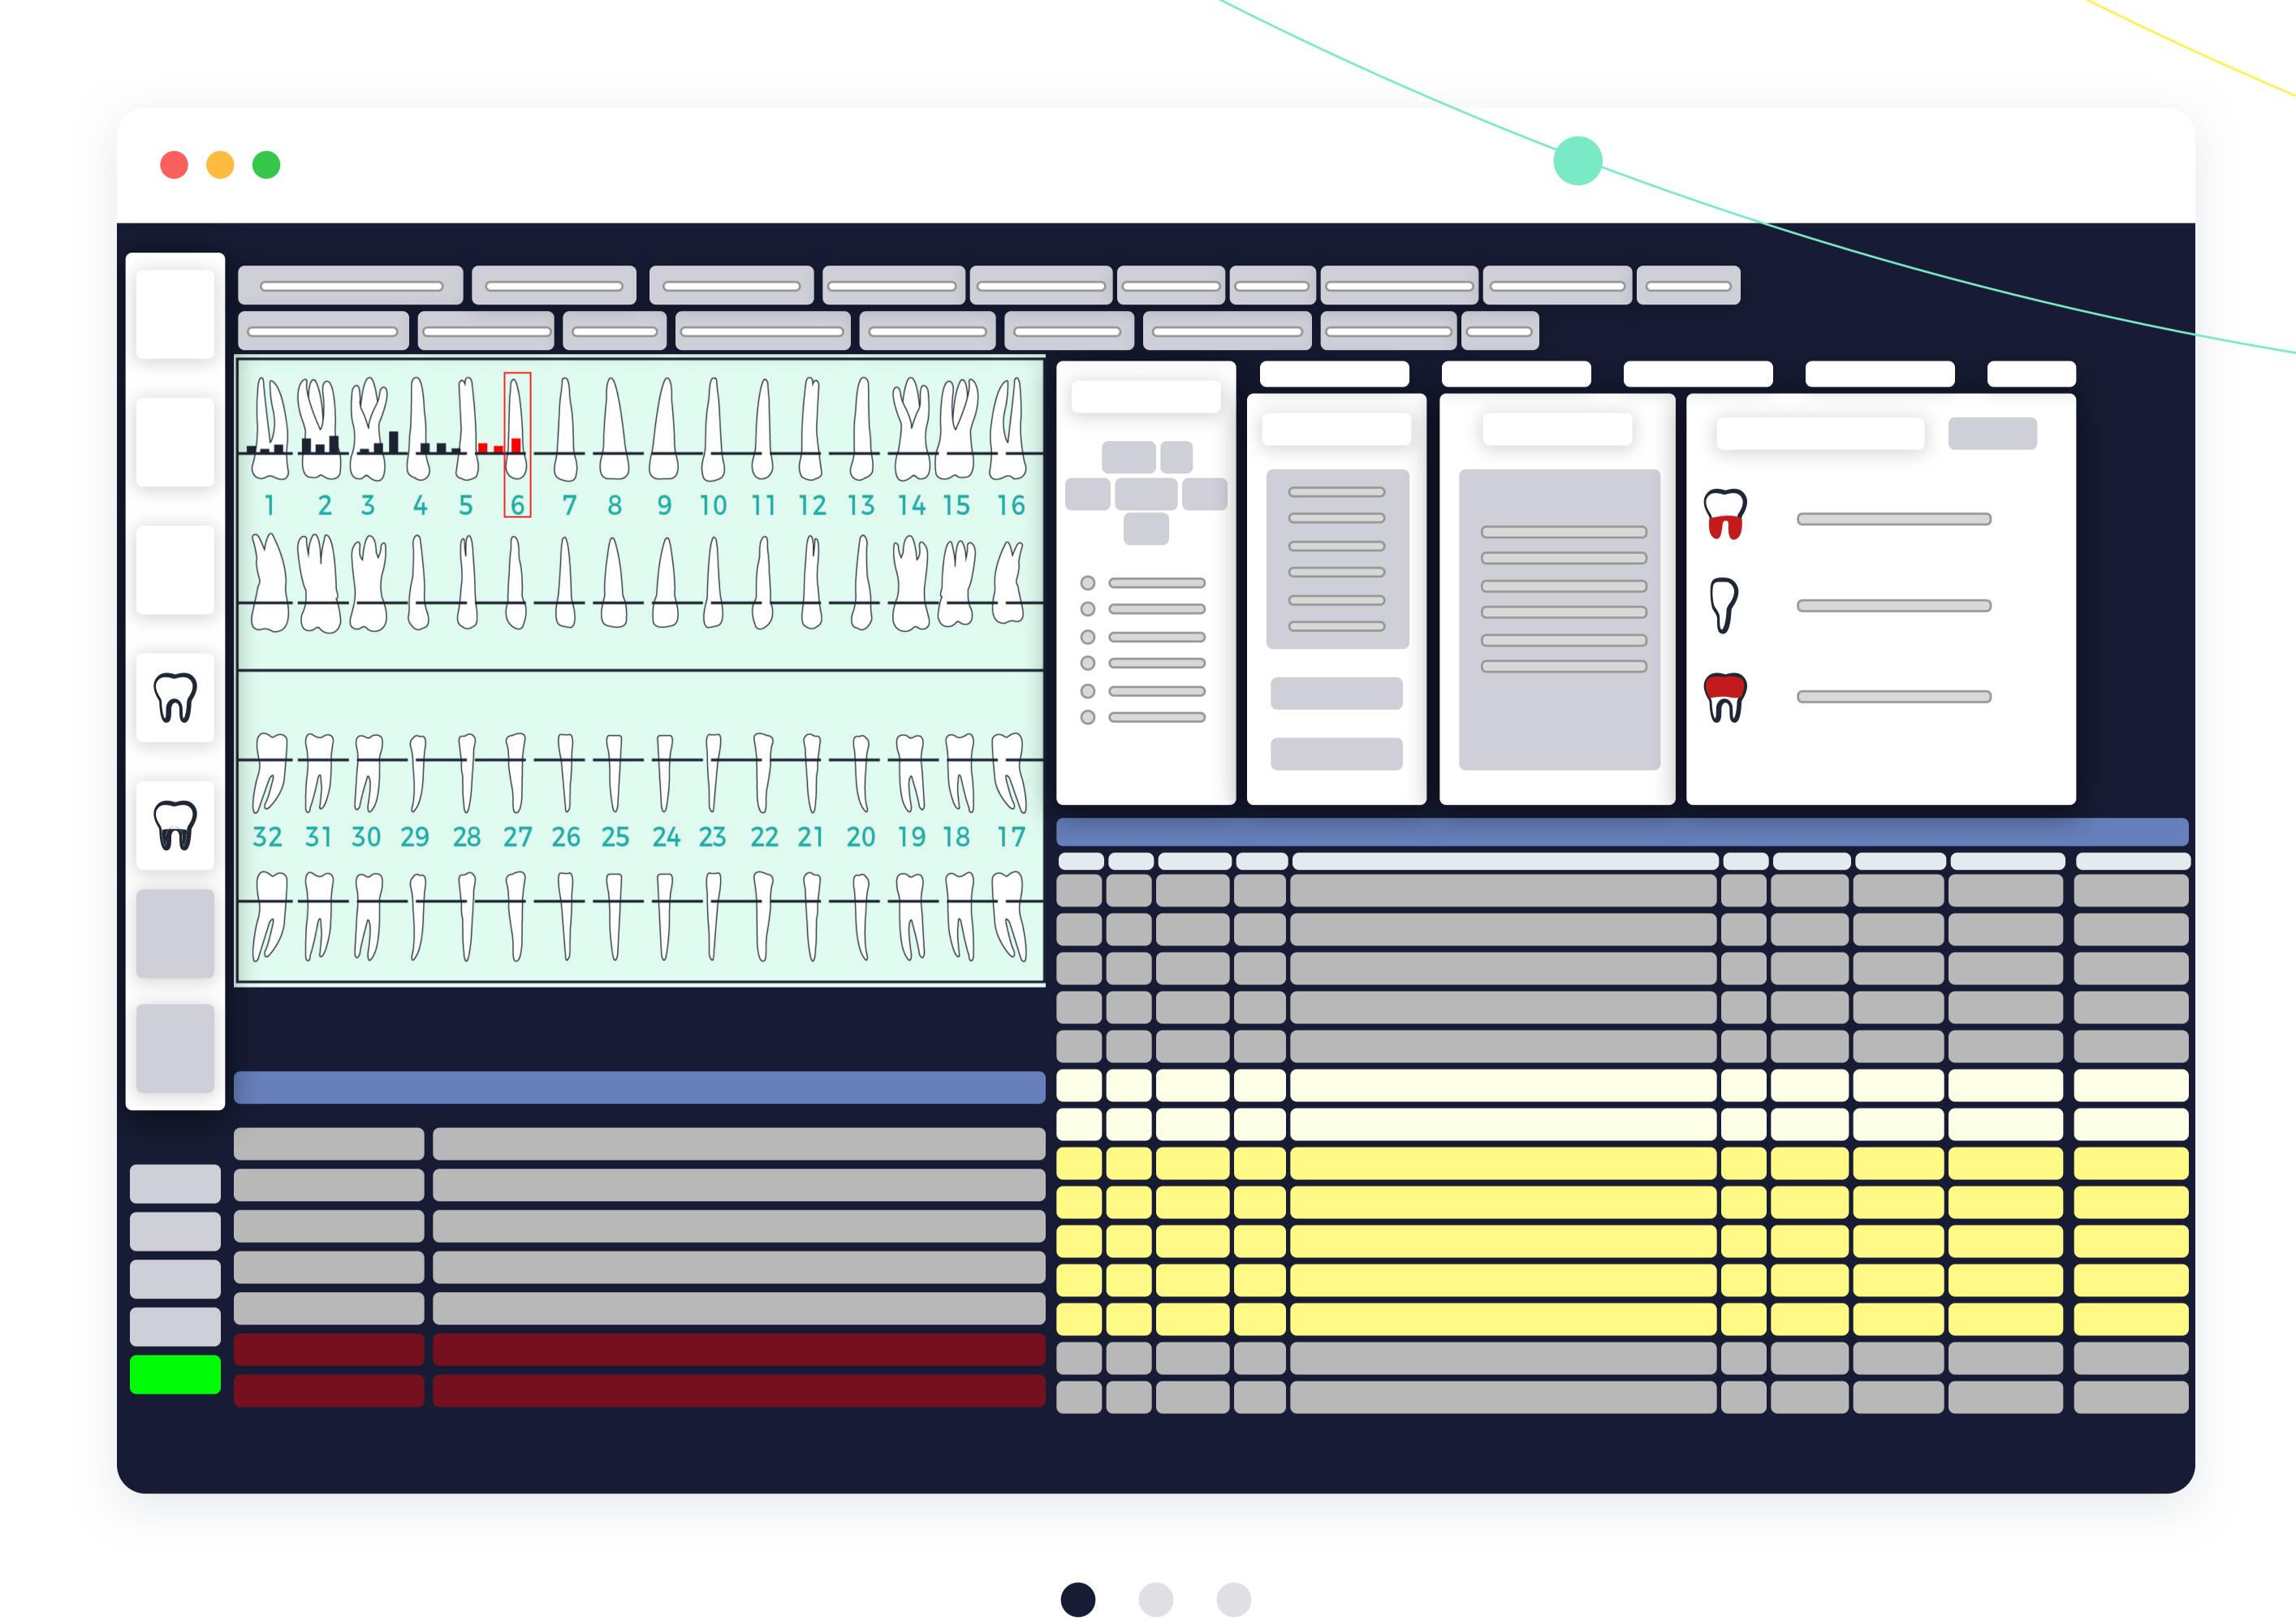

charting, perio-charting, clinical notes, procedure documentation and insurance narrative generation.

Works With Your Open Dental Practice Management System

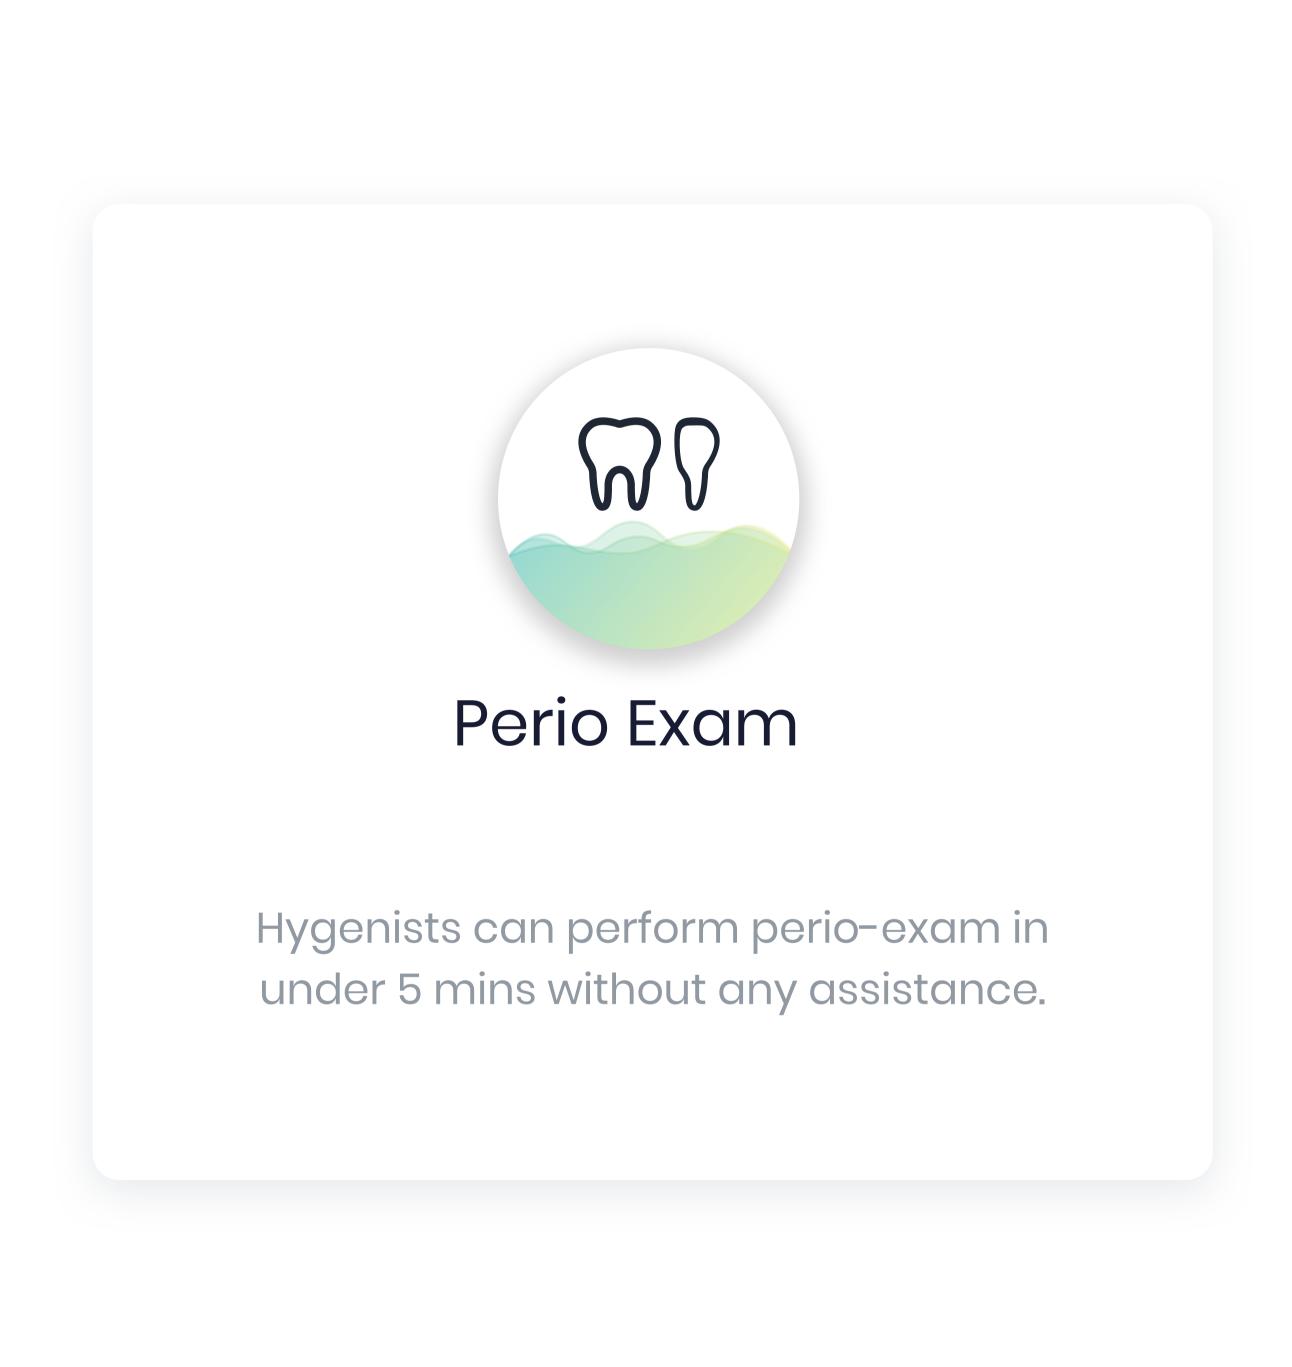

Denta is fully integrated with Open Dental. All your voice notes, charting and procedures are stored right into your practice management system with no additional typing effort.

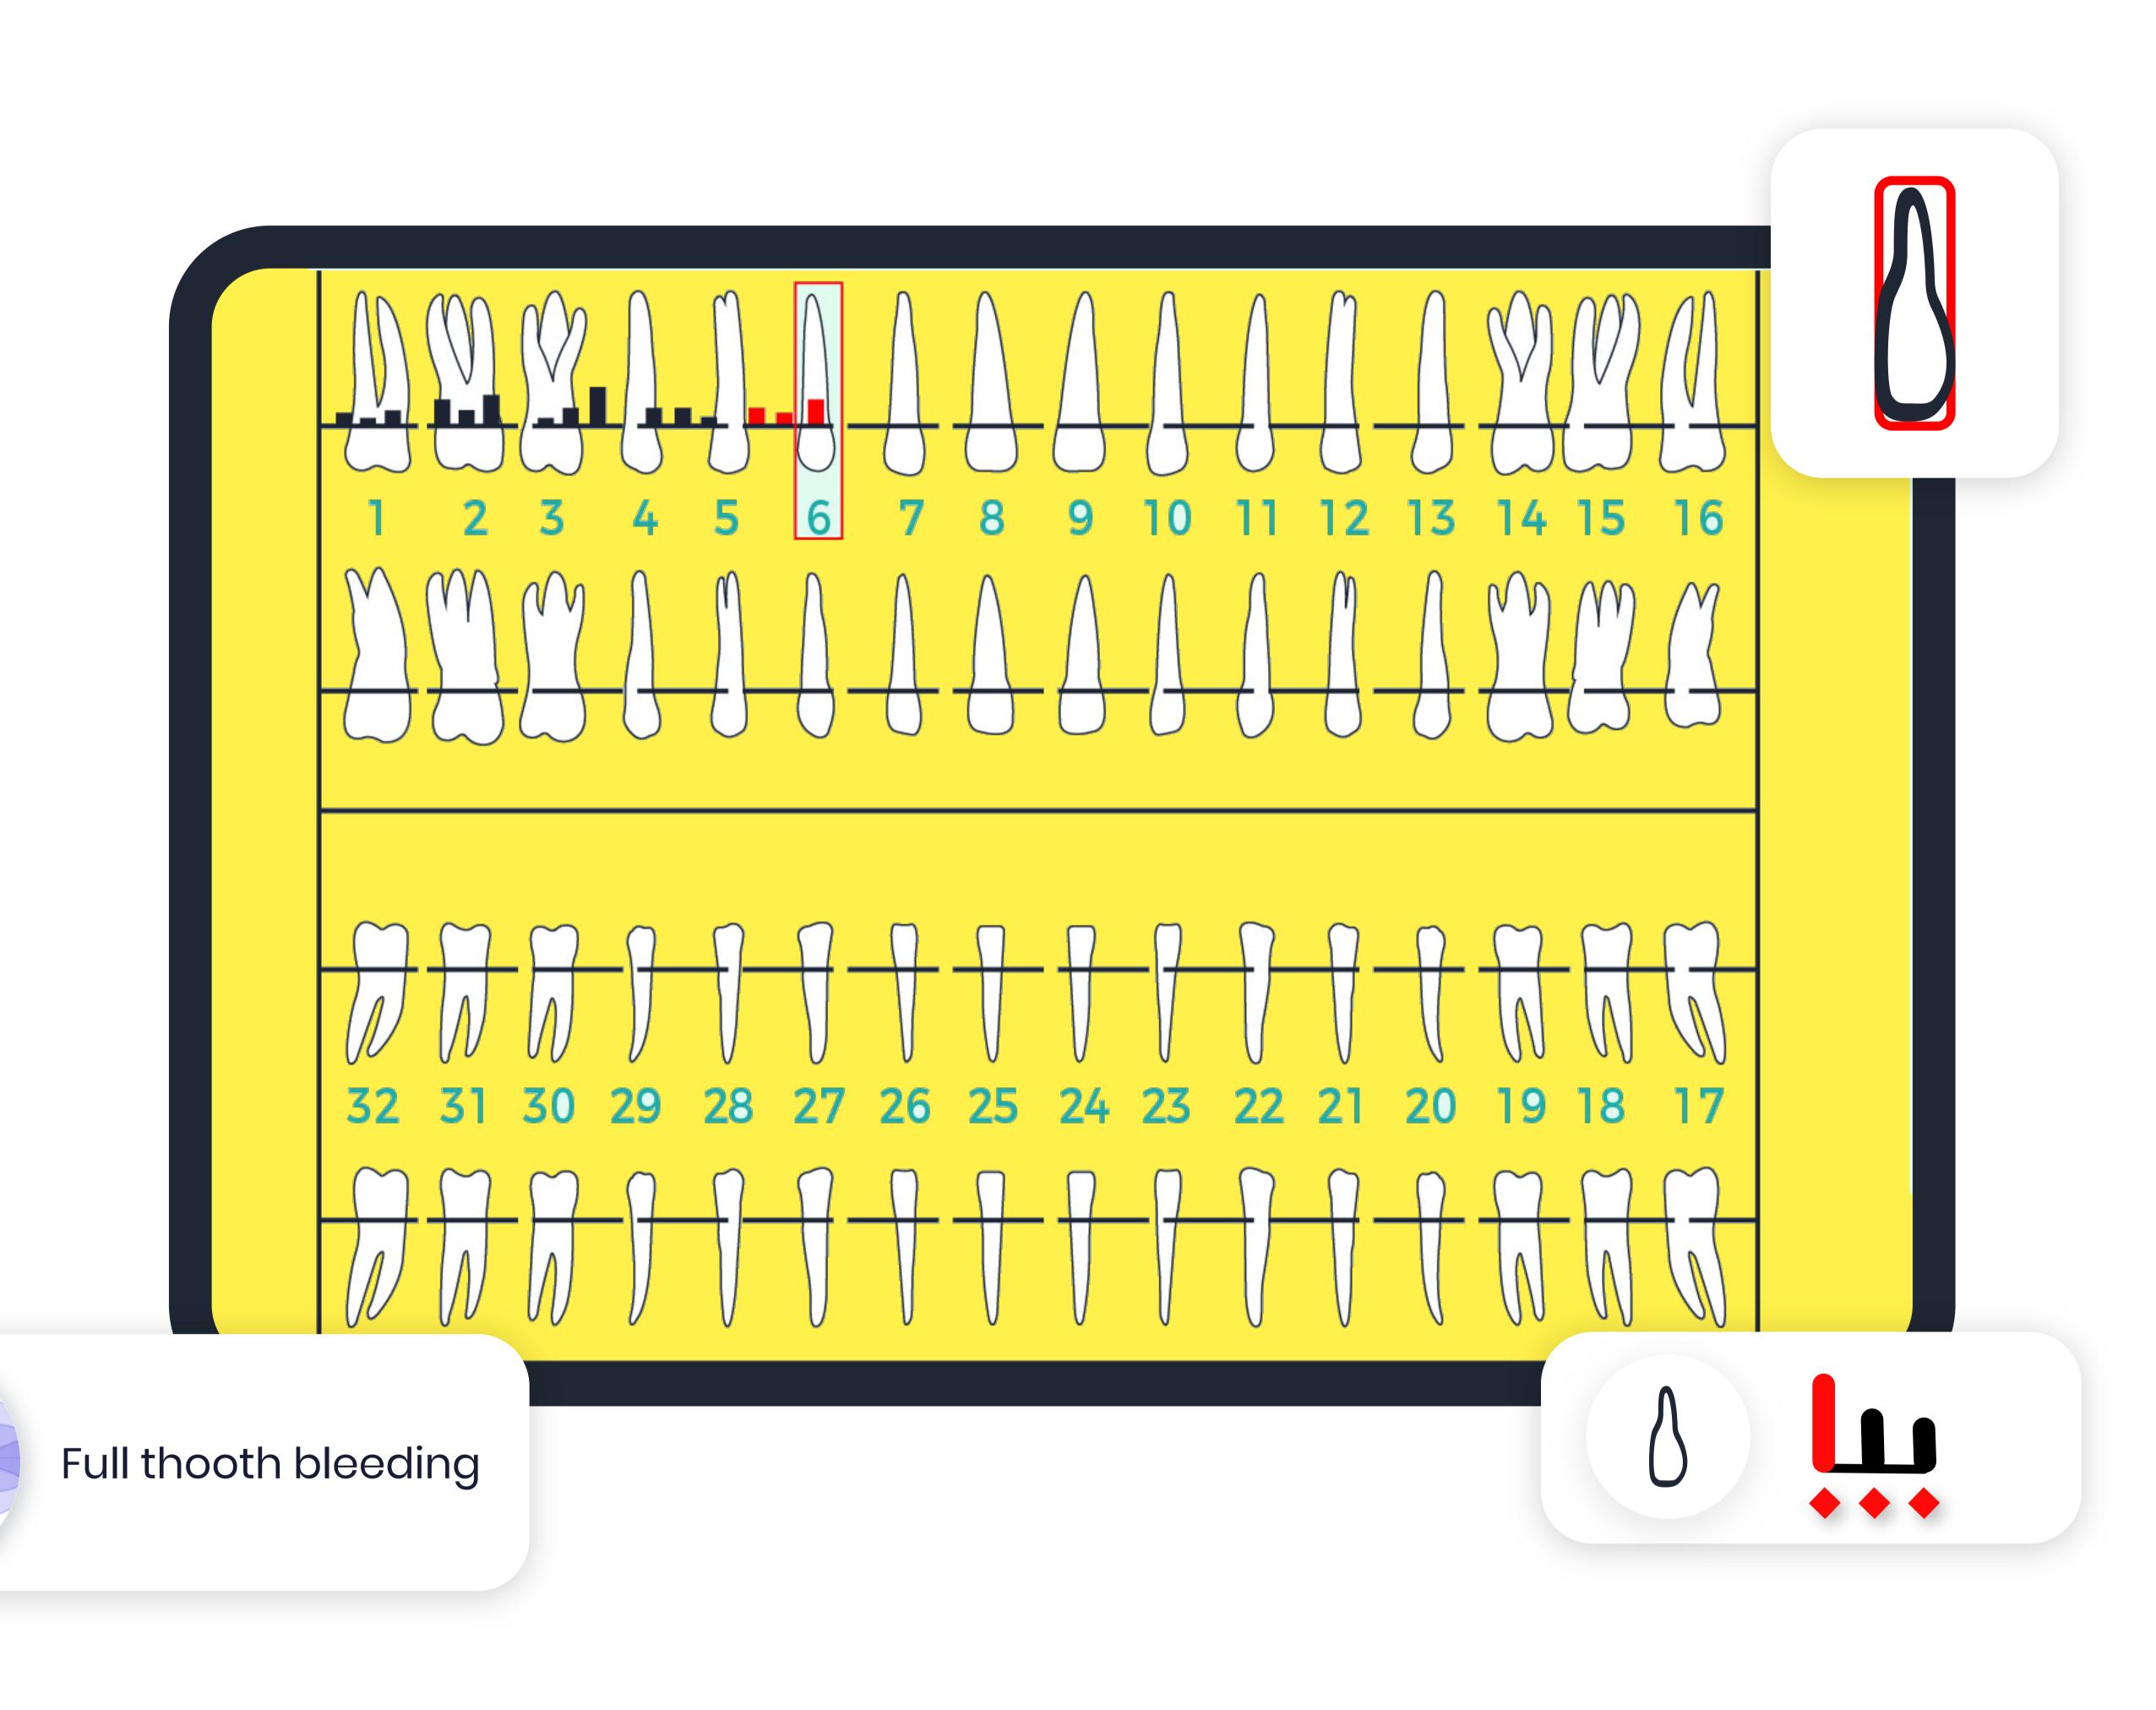

OPEN DENTAL. IN REAL-TIME * Coming soon on other PMS platforms.

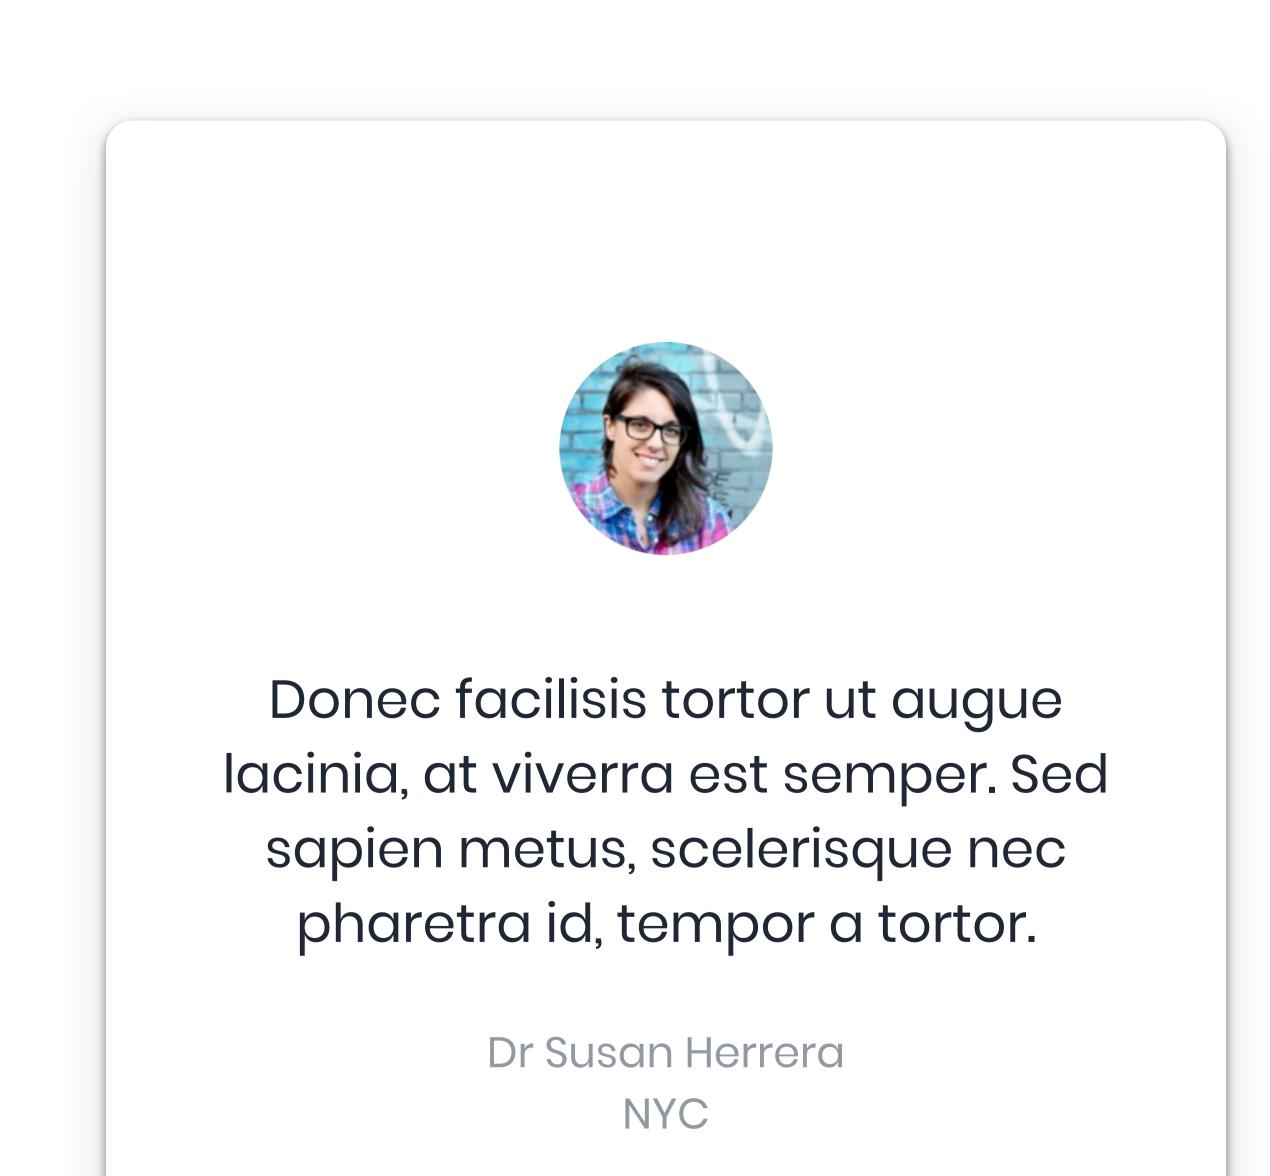

Talk. Speak. Dictate. Get Things Done!

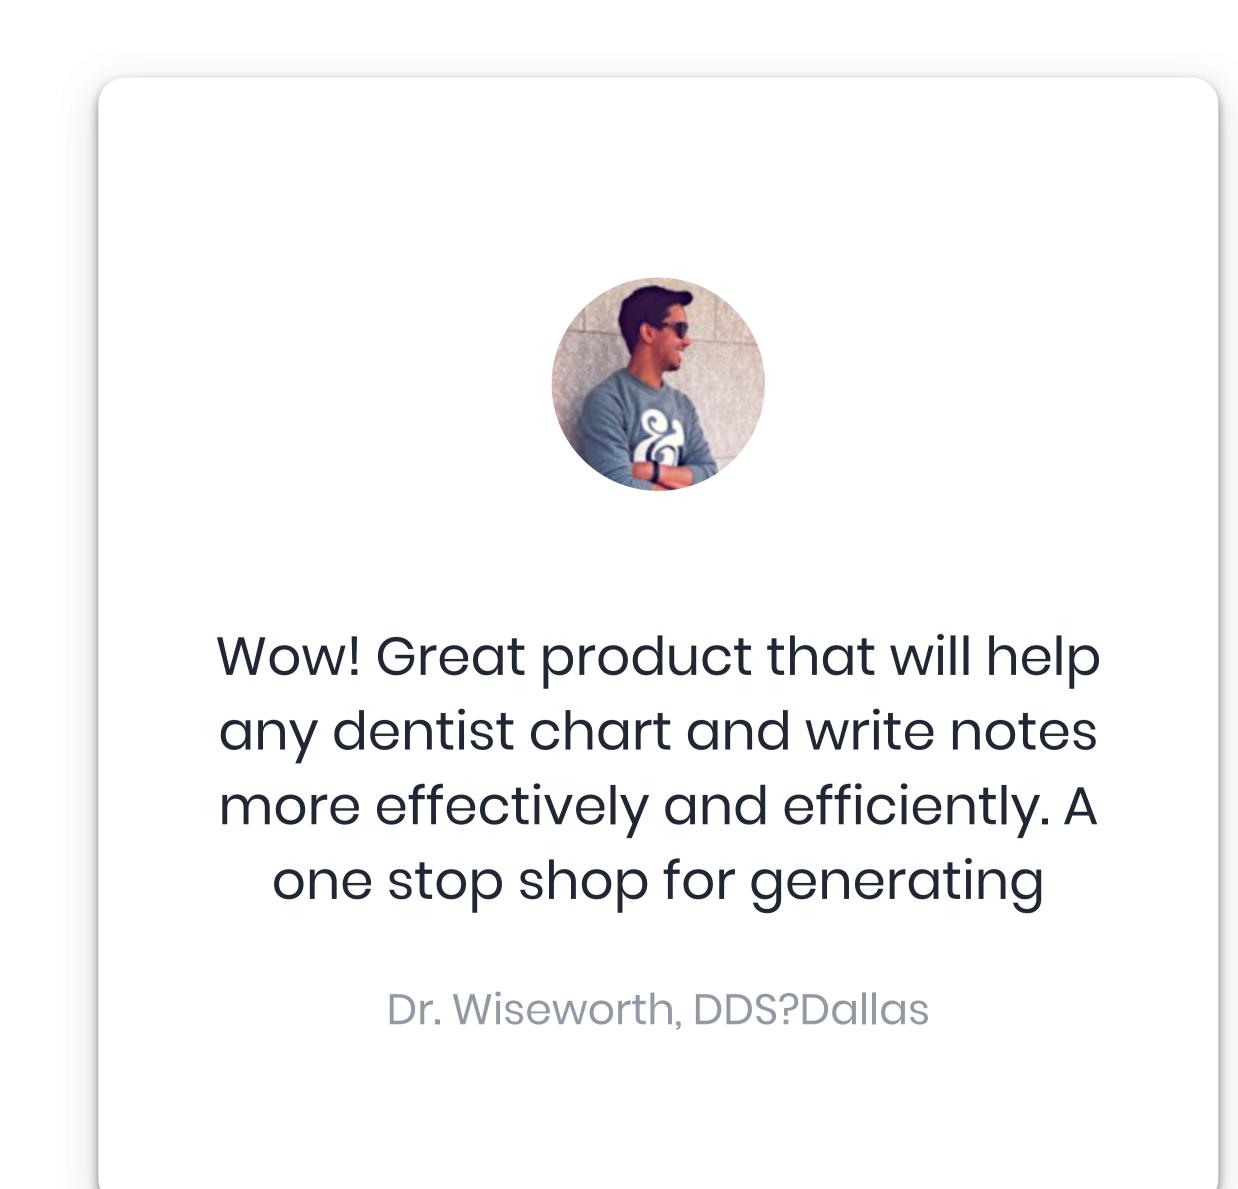

Spend more time with your patients and deliver better care. Leave the rest to Denta. Denta's Al engine takes into account the context and intent of your voice instructions and delivers exceptional speed and precision.

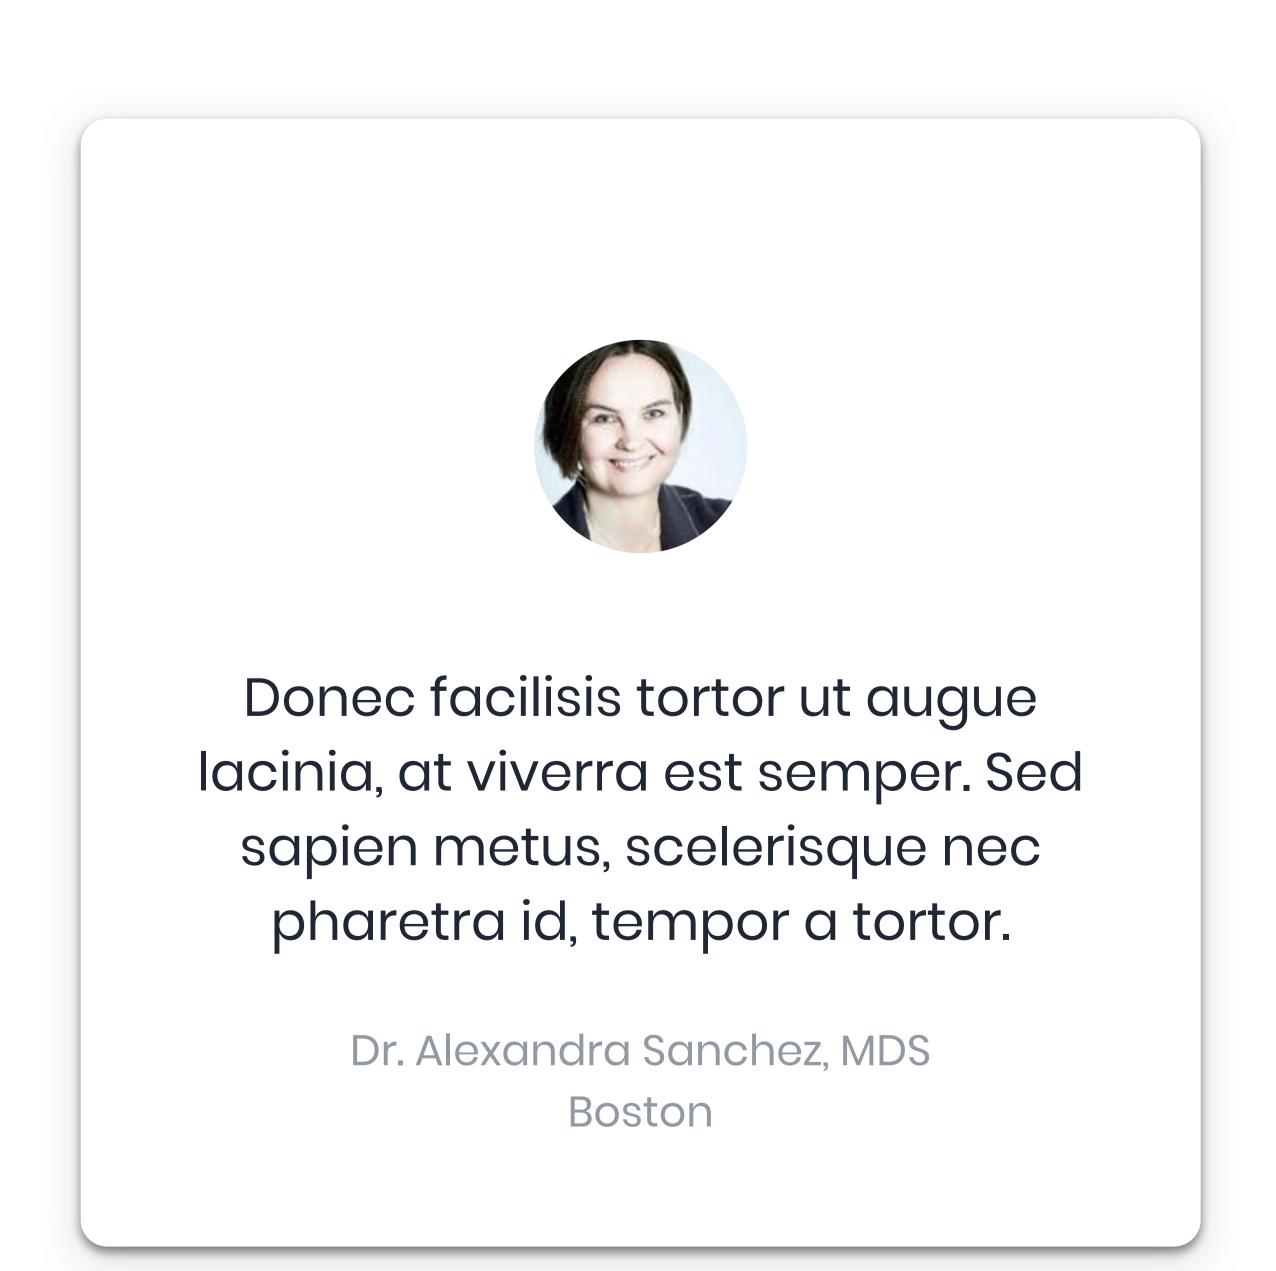

A Voice Experience that Dentists Love

VOICE DENTAL

Voice Dental (Denta) is an Al-driven digital voice assistant developed by nFold Al, an Austin, TX based product company focused on solving key challenges in the healthcare industry.
